Sectyne and CSFI enter the Scandinavian Cyberspace Operations training market

Sectyne and the Cyber Security Forum Initiative (CSFI) are thrilled to announce that we now are working together with Cyberspace Operations training in Scandinavia where Sectyne has exclusive rights to conduct training in these countries (Sweden, Finland, Denmark, Norway and Iceland).

The Cyber Security Forum Initiative (CSFI) is a non-profit organization headquartered in Omaha, NE and in Washington DC with a mission "to provide Cyber Warfare awareness, guidance, and security solutions through collaboration, education, volunteer work, and training to assist the US Government, US Military, Commercial Interests, and International Partners."

Sectyne is a full-stack cyber consultancy operating in and out of Sweden and the United States, providing tailored services, advisory consultations and training in the fields of Cyber Engineering and Architecture, Cyber Security Strategy and Information Assurance and Cyber Defense and National Security.

"CSFI has a long-standing and successful history of training Cyberspace Operations units all over the world where there's no equivalent training commercially available on the market. We are very thrilled about being able to offer this type of training in Scandinavia!"
Janne Haldesten, Co-founder and Director at Sectyne

"Sectyne demonstrates an exceptional mastery of cyber professional skills! I am delighted to be part of Sectyne's efforts to create a stronger cyberspace operations training posture between Sweden, Nordic countries, and the US. Sectyne is capable of approaching problems from multiple points of view, applying sound logic to problem solving."
Paul de Souza, CSFI President

The courses that we offer to the Scandinavian market are:

ICWOD	Introduction to Cyber Warfare and Operations Design (2 days)
DCOE	Certified Defensive Cyber Operations Engineer (3 days)
CCA	Certified Collections Analyst (3 days)
CSCOE	Certified SCADA Cyber Operations Engineer (5 days)
RCCJOA	Radicalization and Counter/Cyber Jihadist Operations Analyst (1 day)

The first planned training dates in Gothenburg are:

Oct 8-12	ICWOD + DCOE (cyber warfare core training), 5 days incl. certification
Oct 13	RCCJOA, one day training incl. certification
Oct 15-19	ICWOD + DCOE (cyber warfare core training), 5 days incl. certification
Oct 20	RCCJOA, one day training and certification
Nov 12-16	ICWOD + DCOE (cyber warfare core training), 5 days incl. certification
Nov 17	RCCJOA, one day training and certification

A minimum of eight (8) students are required for each training opportunity.
During open trainings participants may come from other countries.
Depending on the number of participants that come from the Stockholm region, the training can be held there too.

Notice:
Sectyne and CSFI screen all applications, where we, for instance, will not allow any applicant whose name appears on the U.S. Department of the Treasury's Office of Foreign Asset Controls (OFAC) Specially Designated Nationals (SDN) List or on OFAC's Consolidated List to enroll in a CSFI-sponsored course.

Contact Sectyne at training@sectyne.com for course enrolment, or if you have any questions regarding training.
